## Year 2 Mathematics Teacher Assessment

Working below age-related expectation
These children can:
Practise and recall facts and skills (i.e. Curriculum objective)
Use objects and mathematical manipulative, pictures and simple recording to represent concepts

Start to talk about their work
Solve simple problems with support

Name:

## Working at age-related expectation

These children can:
Apply facts and skills to problems and investigations, identifying what they need to be know and what they need to be able to do in order to solve problems

Represent their work in a variety of ways
Describe and explain their work using mathematical language to reason Make connections and links between mathematical ideas

## Class:

## Working at greater depth

These children can:
Work independently to choose ways to tackle and solve problems of greater complexity Present work in a clear and organised way, choosing appropriate methods of recording Explain work clearly and accurately using mathematical language

Use reasoning to make predictions, conjectures and generalisations and ask their own questions

Use their maths skills confidently in a variety of contexts, including cross curricular tasks

When making your judgement, number domains always hold the most weighting and should play the major role in informing your decision.
